# CALIBRATION AND MAINTENANCE

## The Mandatory Programme For Your OTDR

In the fibre-optic sector, measuring devices are subject to a **periodic calibration obligation**. Network operators such as Swisscom require a calibration date within a specified period for all measurement protocols and proof of work. As a certified service centre and EXFO Gold partner, we check and calibrate according to the manufacturer's specified test criteria and create corresponding **verification documents**.

We guarantee quick delivery, 100% reliability, and best customer service.

### Calibration & Maintenance EXFO QUAD OTDR

Following services are included:
